Dear Sir,

Solar powered V-SAT connectivity to Kiosk/Fixed CSPs in the Sub-Service Areas- Support under FIF.

The Information and Communication Technologies play an important role in rural development specially in financial inclusion. The Empowerment of rural communities is crucial for the development of the rural areas. Bringing the people in the rural areas in the mainstream of the digital technologies to access and adopt modern technologies is a major concern now. The main problem however is connectivity which is the main roadblock for making available banking services in the far flung areas.

02. VSAT technology offers connectivity without geographical or location constraints and hence is an ideal option for rural areas with difficult terrain in the country. VSAT is capable of supporting Internet, data, LAN and voice/fax communications. This technology is useful over geographically dispersed areas and in places where no such infrastructure is established. In view of the above, it has been decided to provide support under FIF for the setting up of solar powered VSAT to kiosk/fixed CSPs to address the issue of connectivity as also power supply in the Sub Service Areas.

03. Details of the Project: The details of the project are as indicated below:

- A. *Institutions Supported* – The support will be available to any bank which have been allotted Sub-Service Area as indicated in the list in Annexure 1. Support will also be available to those SSAs which have not been included in the list of 894, provided that the areas are having no connectivity and banks are interested subject to clearance of SLBC. SLBC will be responsible for checking the status of connectivity & give its recommendation.
