We request the concerned line departments to take up the matter.

AGENDA NO. 14

(a) Functioning of DCC/DLRC

It was observed that DCC / DLRC meetings are not held in time and frequently rescheduled at the last minute. Even issues are not prioritized for discussion. SLBC may discuss ways to strengthen this important forum.

(b) Strengthening of LDMs

The DFS and RBI has been stressing for the need to improve the infrastructure at LDM offices and strengthen the office of LDM with adequate staff, vehicle, internet facility etc to enable LDM to discharge the duties effectively.

Controllers of the Lead Banks are requested to provide adequate staff and other infrastructure facilities to strengthen the LDM's office.

AGENDA NO. 15

Conduct of SLBC Meetings

It is observed that the Reports/Data is received from many Banks with inordinate delay, that too after constant persuasion through mails/personal contacts, resulting in delay of the consolidation process at SLBC. Further, on many occasions a lot of inconsistencies are observed in the data so submitted by Banks and a lot of time is lost in getting the corrected data. Inconsistencies are also observed in the District-wise data being submitted by the Banks to LDMs & SLBC and reconciliation of the same is also delaying the consolidation process.

Controlling Heads of Banks are requested to sensitize the staff responsible for preparation and submission of data as per time lines to enable SLBC to submit the data to all concerned as per schedule and conduct the meetings of SLBC as per the yearly calendar.

As per the Govt. of Odisha Resolution no. 13284 dated 30.04.2016, seven Sub-Committees are formed. The Chairman/Chairpersons of these Sub-Committees are requested to hold the meeting in regular interval to strengthen the SLBC.

AGENDA NO. 16

- (ii) They may also collect applications for restructuring of loans and sanction of fresh loans by visiting people in the affected areas, in coordination with the District Administration.
- (iv) Banks should make their own assessment of loss for restructuring and sanction of fresh loans for the victims of the Cyclone.
- (v) Banks to use the dispensation and concession in the interest rate provided by RBI for restructuring of loans in the affected areas.

(vi) SLBC convener to provide information regarding restructuring and sanction of fresh loans of all the banks in the affected areas in the format provided by DFS.

(ii) Performance of Public Sector Insurance Companies was found to be unsatisfactory in settlement of claims.

RESOLUTION

Sub: Guidelines for "Mission Shakti Loan" – Interest Subvention Scheme for Women Self Help Groups (WSHGs)

1. Overview:

Odisha is one of the pioneer states in the Women's Self Help Group movement in the country through which there has been remarkable progress in empowerment of women in the State. Since 2001, "Mission Shakti" has been a noteworthy endeavour for women's empowerment in the State of Odisha. Under Mission Shakti, the SHG-Bank Linkage Programme is a major Financial Inclusion initiative, aiming at ensuring access to institutional credit by Women Self Help Groups, thereby promoting sustainable livelihoods.

In recognition of women members' efforts towards entrepreneurship at SHG level, the State Government announced the Interest Subvention Scheme for Women Self Help Groups (WSHGs) with effect from 1st April 2013, making the effective rate of interest as 2% for loans up-to Rs. 3 lakhs. Subsequently, considering the growth in credit off take of SHGs and to further reduce the interest burden, to encourage SHGs to invest more capital in livelihood activities, the effective annual interest rate was reduced to 1% for women SHGs in the State, for loans up to Rs 3 lakhs from 1st April 2015. In the meantime, the State Government has approved to provide **interest free loans i.e at 0% per annum for Women Self Help Groups**, for loans up to Rs. 3 lakhs effective from 1st April 2019 to accelerate the SHG bank linkage programme in the State and to further livelihood promotion of women SHGs.

For better visibility, creation of greater awareness among WSHGs, increased response of banks to SHG Bank linkage and improved monitoring, the State Government has renamed the Interest Subvention Scheme as "**Mission Shakti Loan**" – Interest free loan for WSHGs.

2. Objectives:

- 2.1. To reduce the interest burden on WSHGs.
- 2.2. To enable WSHGs to invest more capital in livelihoods activities resulting in improved quality of life.
- 2.3. To enhance credit access to WSHGs at an affordable cost, to meet their credit requirement, creating an enabling environment for enhancing productivity and reducing vulnerability.
- 2.4. To inculcate prompt repayment culture among WSHGs availing credit from Banks.

3. Target:

The **Mission Shakti Loan** (State Interest Subvention Scheme) is aimed at benefiting all prompt and regular repaying WSHGs functioning in the State of Odisha **(both rural and urban areas)**, irrespective of their promoting agency.

4. Interest Rate:

- 4.1. The effective rate of interest for all WSHGs will be **at 1%** per annum only on prompt and regular repayment for a loan. This benefit is available for loans up-to Rs. 3 Lakh. Beyond loan limit of Rs. 3 Lakh, Banks will charge the usual lending rate. This is applicable from 1st April 2015 to 31st March 2019.
- 4.2. From 1st April 2019 the effective rate of interest to WSHGs for loans upto 3 lakhs will be at **0% (interest free)** with other conditionalities remaining the same.

5. Period of Implementation:

WSHGs, who have outstanding loans as on 01.04.2019 and availing loan on or after 01.04.2019 and repaying promptly are eligible for benefit under the Mission Shakti Loans at 0% interest rate per annum from 01.04.2019.

The benefit will be available up to Rs.3 lakhs. Excess of loan amount above Rs. 3 lakhs, will be charged at normal rate of Bank interest.
- 7.2. To administer "Mission Shakti Loan", a dedicated SHG Bank Linkage and Interest Subvention MIS portal will be created covering all Banks of the State for better monitoring and on time delivery of the Mission Shakti Loan benefits to WSHGs.
- 7.3. Willful defaulters of Women SHGs may not be financed under this scheme. The willful defaulter of the Groups shall not generally get benefit of further assistance until the outstanding loans are repaid. In case of defaulters due to genuine reasons, Banks may follow the norm suggested for restructuring the account with revised repayment schedule of RBI. Capital Investment Subsidy Scheme under National Bamboo Mission Procedure for Sanction and Release of Subsidy

1. Advance Subsidy

50% of the eligible subsidy amount will be released by State level Bamboo Development Agency advance as per the requirement. Accordingly, State level Bamboo Development Agency would release 50% of the subsidy amount to the participating bank in advance for keeping the same in a Subsidy Reserve Fund Account of the concerned borrowers, to be adjusted finally against loan amount of the bank towards the end of the repayment period. This 50% advance subsidy would be released by State level Bamboo Development Agency to the participating bank on submission of a project scrutiny note cum claim form.

2. Final instalment of subsidy

The subsidy released to the bank for individual project will be kept in a separate borrower-wise account. The adjustment of subsidy will be back-ended. Accordingly, the full project cost including the subsidy amount, but excluding the margin money contribution from the beneficiary, would be disbursed as a loan by the banks. The repayment schedule will be drawn on the loan amount in such a way that the total subsidy amount is adjusted after the full bank loan component with interest is liquidated.

4. Utilisation Certificate

After release of final instalment of subsidy, an Utilisation Certificate is required to be submitted by the financing bank certifying that the full amount of subsidy received in respect of the project has been fully utilised (by way of crediting to

Chairman RRBs (Through Sponsoring Bank)

Subject: Credit and Debit Cards- Issuance of Contactless/NFC cards (NCMC compliant) to the customers while issuing replacement cards or new cards- reg.

Kind reference to this departments OM of even number dated 19th July 2018 on issuance of Contactless/NFC cards.

2. In this regard, it is further informed that with a view to adopt **National Common Mobility Card (NCMC)** ecosystem, (ONE CARD ONE NATION), it is also essential that **the NFC/Contactless cards is equipped with National Common Mobility Card (NCMC) compliant (offline wallet) as a default option.** This will help in promoting use of one card in all payment system (transit operators, Retails, E-commerce etc) across India, with an objective to facilitate digital transaction for small daily payments. This will also help in driving low value and high frequency digital payments, leading to a change in consumer behaviour to daily usage.
3. In view of the above, there is a need to ensure that the efforts are made to create acceptance infrastructure for contactless card based payments across the country. This also requires ramping up availability of NFC/Contactless cards equipped with NCMC functionality (offline wallet) as a default option with the citizens/customers.
4. In the above background, Banks are accordingly requested to take necessary action to ensure that ReCarding as well as issue of new cards should be NFC enabled/contactless equipped with NCMC functionality (offline wallet) as a default option. Action taken in this regard may be shared with this department on fi-dfs@nic.in (copy to missionfi@nic.in)

1 Executive Summary

The digital penetration in retail segments is increasing gradually on card as well as mobile platforms with the holistic effort of financial institutions, customers, solution providers and government. However, the digital adoption is limited across low value payments in segments including retail, transit, toll, parking and smart cities.

Key Requirements of the ecosystem are

- Need for **offline transactions** in low value payments - **faster speed with near zero declines**
- Need of payment solution which is **independent of network connectivity**
- **Challenges in terms of existing banking infrastructure** to support huge surge in digital transaction on account of low value payments digitization

National Common Mobility Card (NCMC) program, as envisaged by MoHUA (Ministry of Housing & Urban Affairs), offers the above proposition and is proposed to be rolled out on RuPay Contactless Product.

This card may be used for all payment applications (low value – offline/high value – online) including transit, retail, toll, parking and smart cities. The stored value of the card offers the offline transaction proposition across all low value segments. The additional feature of service area on the card may be used for any merchant specific application e.g. season tickets etc. Further, it is also feasible to provide targeted government incentives e.g. medicines, books etc. through NCMC. The card may be issued as Debit/ Prepaid/Credit Card.

RuPay - NCMC implementation is aimed at providing a vendor and bank agnostic digital payment platform wherein customers may use RuPay NCMC cards issued by any bank for digital payments across various segments. The implementation should ensure multi-bank cards are accepted wherein the customers should be able to use RuPay cards issued by any bank including local or small banks.

The single most important factor in **proliferation of RuPay NCMC requires default issuance by key banks** in the country. In addition to that, it requires cohesive support from all stakeholders as below:-

Segments	Merchant/Operator	Banks	NPCI	Government
Transit and Smart Cities	NCMC implementation for all greenfield projects. Phase-wise upgradation for Brownfield projects	Issuance of RuPay - NCMCs as default Debit/Prepaid/Credit Cards to avoid any project specific issuance.	Specification support to involved stakeholders including operators, bank and vendors to develop the ecosystem	Financial support for AFC/ETIMs and Transaction charges Mandates through respective Ministries for implementation of open loop RuPay – NCMC
Retail	Acceptance of RuPay – NCMCs	Develop NCMC acceptance ecosystem across various merchants		Mandates to all banks for Issuance & acceptance for RuPay - NCMCs
Para-Transit	Acceptance of RuPay - NCMCs for Toll & Parking			Mandates for NCMC acceptance at cash lanes

NPMC has been inaugurated by Honorable Prime Minister as One Nation One Card in Ahmedabad on Mar 4th, 2019.

The adherence of RuPay NPMC standards by any card scheme may be presided over by an independent committee of regulator and the ministry and the specification support may be provided by NPCI.

2 Purpose of the Document

This document provides an overview of the National Common Mobility Card (NCMC) program, key features of NCMC specification, benefits to involved stakeholders and the use cases covering transit, toll, parking, smart cities and retail payments. This also covers various aspects related to NCMC implementation including sample implementation model, standard operating procedure (SOP) and roles & responsibilities of involved stakeholders. NCMC proliferation strategy has also been covered in this document to achieve higher adoption and penetration of the NCMC cards across all use cases; with the brand name of **'One Nation One Card – One Card for all Payments'**.

With the aim of digitizing the payments across each segments (low value as well as high value), a huge surge is expected in number of digital transactions which may have a challenge in view of existing banking infrastructure. This requires the offloading of low value transactions from real time processing by the bank. This will help to digitize the low value payments with near zero failures.

RUPAY - NCMC offers the additional feature of offline transactions for low value payments at a faster speed with near zero declines. This card may be used for all payment applications (low value as well as high value) including transit, retail, toll, parking and smart cities.

3 Background

3.1 Existing Payments Mechanisms

The banking industry has evolved gradually during the last 3-4 decades with various payment solutions to digitize the retail payments. These solutions are mainly based on two platforms namely Card & Mobile. Card has been the preferred mode of payment in the physical space in view of the customer convenience, familiarity and consumer behaviour while the mobile platform has taken a significant leap during the last few years in the ecommerce channel.

Apart from retail, there are various other segments involving low value payment e.g. transit (bus, metro, suburban railways), toll, parking etc. which are highly dominated by cash based tickets. The customer takes paper ticket by paying cash either at ticket counters or during journey. Various operators of these segments have implemented closed loop/semi-closed loop cards based digital payment collection system. The lifecycle of such cards is being managed by respective operators. Few operators have also adopted the mobile based solution for digital fare collection.

However, the digital adoption is very limited across these low value segments due to interoperability challenges of closed loop/semi-closed loop cards.

3.2 Challenges and Limitations

The existing cash based payments practice for low value payments across various segments has multiple challenges e.g. cash handling, revenue leakages, pilferages etc. The adopted digital payments practice suffers from the key challenge in terms of interoperability and other challenges as mentioned below:-

- Closed loop/Semi-closed loop cards have usability limited to specific merchant/operators and hence customers need to carry multiple cards for multiple use cases.
- Popularity of these cards among citizens is limited due to restricted usage of the card and hence lower digital penetration. Moreover operators/merchants need to bear extra cost for life cycle management of the cards.
- In context of Indian scenario, where network connectivity is a challenge, any mobile based payment collection system will have limited digital penetration.
- Low value payments pose a huge challenge of volume, where transit alone generates close to 10 crore transactions a day. Online authentication of such volumes can lead to greater number of declines.

In view of the above challenges and the need to drive the digital payments adoption across all segments with high as well as low value payments, there is a requirement of a common card payment system wherein a single card may be used for all payment applications including transit, toll, parking, smart cities and retail.

4 National Common Mobility Card Program

4.1 Introduction

With vision of One Card for all Payment systems, Ministry of Housing & Urban Affairs (MoHUA) has come out with a National Common Mobility Card (NCCM) model to enable seamless payment for low value as well as high value payments across all use cases including travel by different metros and other transport systems across the country, retail shopping and purchases. A committee was formed with representatives of National Informatics Centre (NIC), Centre for Development of Advance Computing (C-DAC), Bureau of Indian Standards (BIS), National Payment Corporation of India (NPCI) and the Ministry of Finance.

After extensive study of various models being followed across the world, the Committee recommended the EMV Open Loop Card with stored value based model and the same was approved. This card meets travel needs based on stored value of money and can be used for all low value payments including travel by any means of transport, smart cities, toll, parking etc. and also enables account based retail applications. Accordingly, this card does away with the need of carrying separate cards for banking and transit requirements.

NPCI has been working with MoHUA, Government of India for implementation of National Common Mobility Card Program (NCCM). This specification is dual interface (contact & contactless) EMV card based specification and is interoperable based on open standards. This is aimed at low value payments for various segments e.g. Transit, Smart cities, Toll, Parking and other low value merchant payments in addition to the normal day to day retail payments. These specifications are capable of supporting not only payment products but also transit applications like monthly passes, season tickets & government applications such as social security, driving license, Id/access card etc. This results in increased customers convenience as it allows customers to use the same card for variety of needs.

4.2 NCCM Proposition: EMV Open Loop Card with Stored Value

The NCCM committee, as mentioned in above clause, identified the key requirements of this NCCM Card as Interoperability, Open Loop, EMV Chip, Offline transactions and minimum transaction time. Based on their requirements and study of international markets, the committee studied three models of proposition:

- Model 1 - Closed Loop based Solution
- Model 2 – EMV Open Loop Account based Solution
- Model 3 – EMV Open Loop Card with Stored Value

The comparative analysis of these three model are as mentioned below:-

Particulars	Model 1 – Closed Loop	Model 2 – EMV Open Loop Account based	Model 3 – EMV Open Loop with Stored Value
Proposition	<ul style="list-style-type: none"> ◦ Issuance of closed loop cards by respective Operators to digitize the payments ◦ Usage for services provided by the respective Operator 	<ul style="list-style-type: none"> ◦ Usage of bank issued EMV cards which are linked to account ◦ Fare calculation as well as debit from account to be done at the backend post processing of offline transactions by terminal 	<ul style="list-style-type: none"> ◦ Usage of bank issued EMV cards with stored value on the card ◦ Supports offline transaction without financial risk to Operator or Financial Institutions ◦ Provision of season tickets on the card
Limitations	<ul style="list-style-type: none"> ◦ Lacks the key feature of interoperability ◦ Restricted usability for services provided by the respective operator only ◦ Extra cost to operators in maintaining the payments mechanism and card lifecycle management 	<ul style="list-style-type: none"> ◦ Risk of insufficient balance on the card as the transactions are based on deferred authorization ◦ Challenge in storing the season tickets on the card ◦ Increased capex and opex due to manage the backend ◦ Challenge for Bank infrastructure to manage the large volume of low value transactions on real time basis 	

Considering the Indian Transit scenario, available infrastructure for bank & operators, market dynamics, feedback from financial institutions and the customer behavior; Model 3 – EMV Open Loop Card with Stored Value was finalized as the ideal model for NCMC Card.

The Report of the committee for standards and specifications of National Common Mobility Card is available at link - <http://mohua.gov.in/upload/uploadfiles/files/CommitteeReportofNCMC03.pdf>.

The NCMC specification may be adopted by all Payment Scheme Networks operating in the country as communicated by RBI.

4.3 One Nation One Card – Brand Name for NCMC Cards

The NCMC program has been envisaged with a vision of 'One Card for all Payments'. In view of the same, the name of this card should portrait its usability across all segments for all types of payment

applications including retail, transit, toll, parking and smart cities. This will help in wider awareness and acceptance of NCMC cards across the country.

The payment cards (debit/prepaid/credit) issued based on NCMC specification is proposed to be with the brand name 'One Nation One Card'.

4.4 Advantages of NCMC Open Loop Smart Card over Closed Loop Variant

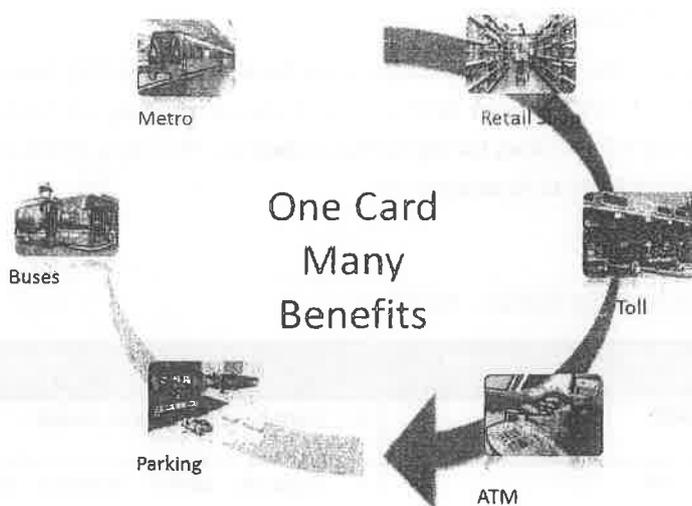

NCMC open loop smart card offers various advantages over the closed loop smart card in terms of various parameters including **customer experience, interoperability, infrastructure requirements, ease of implementation and vendor agnostic solutions**. The details are as enumerated in below mentioned table.

S. No.	Concern	Open Loop Smart Card	Closed Loop Smart Card
1	Customer Friendly	Customer may use the same card for Metro and Bus travel in all the City and States within the country.	Customer need to buy different cards for different public transport Systems.
2.	Convenience	Customers may use their bank issued NCMC card for fare payment rather than waiting in a queue for card/token/ticket issuance.	Customer may require to stand in queue for card issuance, Top up etc.
3.	Loyalty Points	Consumer may benefit from loyalty/reward points from partner banks, as provided in case of Debit and Credit cards.	No such provision. Any such loyalty and discount is a cost to the Public Transport Operators.
4.	Minimum Infrastructure	Public Transport Operators can minimize their cost involved in maintenance of infrastructure and manpower for card issuance, Top up, card replacement and refunds, as open loop cards can be issued by multiple partner banks.	Each Public Transport Operators need to bear the significant expense for maintenance of infrastructure and manpower for card issuance, Top up, card replacement and refunds.
5.	Negotiating Power	As open loop acceptance devices are based on open interoperable standards, there are multiple vendors available for payment acceptance devices, which provide an opportunity for cost and service negotiation.	Closed loop cards may be of proprietary standards, leading to vendor lock in for subsequent purchase and renewals of acceptance devices.
6.	No vendor lock in	Open standards based payment acceptance devices provides the freedom for subsequent purchase and renewals of devices.	Proprietary standards may lead to vendor lock in for subsequent purchase and renewals of acceptance devices.

7.	Ease of Implementation	Well standardized payment acceptance devices and availability of multiple vendors provides ease of implementation. Payments related scope of work to be taken care by partner bank and hence PTOs may focus on their key activities.	PTOs need to evaluate multiple proprietary specifications leading to difficulty in implementation.
8.	Fast Deployment	Due to similar implementation process, best practices and reference implementation guidelines, there will be standardized procurement practices, and RFPs. This considerably expedites the deployment of digital payments in Public Transport Operators.	Each deployment will have specific requirements and considerable expertise is required by each Public Transport Operators for selection of appropriate solution.
9.	Retail acceptance	NCMC open loop card offers acceptance at all the existing retail PoS devices.	Closed loop cards can only be accepted within their operating environments.

5 Vision of One Card Payment System with RuPay - NCMC

RuPay - NCMC offers the proposition of One Card for all Payment Systems wherein a single card may be used for all payment applications including transit, toll, parking, smart cities and retail.

- i. **Multi-Modal Transit:** RuPay - NCMCs may be used across all transit modes including Metros, buses, ferries, suburban railways etc. A citizen would not be required to be dependent on cash or operator specific various closed loop cards. He can use one card for fare payment across any mode of public transport.
- ii. **Toll:** There are significant number of customers using cash lane at the toll plaza and making payment in cash. With the help of RuPay - NCMC, a citizen may pay the toll charges at toll booths by simply tap & pay. This will help to achieve higher digital penetration in toll segment for customers using cash lane.
- iii. **Parking:** A citizen may use the RuPay - NCMCs at parking zones for making payments of parking charges. This will help to reduce the transaction time and increase the digital payments penetration.
- iv. **Smart Cities:** Digital payments play a vital roles in smart cities projects. A common card payment system is the key proposition of smart cities to enable usage of one card for all sorts of payments including transit, civic as well as non-civic payments in the cities. RuPay - NCMCs offer the unique proposition for Common Card Payment System of smart cities.
- v. **Retail:** RuPay - NCMCs may be used in contact as well as contactless mode for retail payments. The customer may use this card for low value payments as well as high value payments. As per RBI existing norms, 2nd factor authorization is not required for transaction below INR 2000. For such payments, the customer may make the payment by simply tap & pay. The offline transaction feature may also be leveraged to reduce the transaction time and eliminate the dependency of network connectivity for extreme low value payments under INR 200.

MoHUA issued an advisory, vide Advisory No. 9, dated June 8th, 2017, advising all smart cities to follow the NCMC standards for implementation of common card payment system. This card is envisaged to be accepted in all kinds of public transport, para transit and non-transit services and other merchant payments like utility bills, taxes, shopping etc. The copy of advisory note is enclosed here as **Annexure – A**.

Ministry of Electronics and Information Technology (MEITY) has also issued an advisory, vide No. 12(39)/2017 DPD, dated April 4th, 2018, recommending all Public Transport Operators to adopt open loop NCMC cards for digital fare collection. The copy of DO letter from Joint Secretary, MEITY is enclosed here as **Annexure – B**.

6 RuPay - NCMC Implementation Model

6.1 Sample NCMC Implementation Model (Bus Transport)

The NCMC implementation is aimed at providing a Vendor and Bank agnostic digital fare collection platform wherein the customers may use RuPay - NCMCs (Debit/Prepaid/Credit Card) issued by any Bank for digital fare payments. This will help the customers to get associated with any bank as per their choice rather than being restricted to a single bank. The acceptance of RuPay - NCMCs issued by multiple banks will further help to get the higher digital penetration for fare collection.

A sample implementation model for State Road Transport Undertakings (SRTUs) – Bus Operators has been shown below for the reference purpose. The same concept will get extended across other segments including Metro, Toll, Parking and Smart Cities with modification as per their existing fare collection system.

6.2 Key Consideration Points for Implementation Model

With the Multiple Issuance Open Loop model, there will be following key benefits to the operators:-

Tangible Benefits	Intangible Benefits
<ul style="list-style-type: none"> ○ Significant reduction in OPEX associated with cash handling and leakages <ul style="list-style-type: none"> ○ Even with a large adoption of closed loop smart card benefits are passed on as discounts for operator issued cards and thus negate the above savings ○ Reduction in OPEX related with card life cycle management ○ CAPEX savings on the infrastructure since it invalidates the need of large scale card issuance and top infrastructure ○ Higher adoption of digital payments 	<ul style="list-style-type: none"> ○ Consumers benefits the most as they need not block their balances for each operator <ul style="list-style-type: none"> ○ A single prepaid account can work across all low value offline payments like bus, parking, retail ○ The cards can be easily topped up with their existing accounts through BHIM and used without any dedicated need of balance check counters ○ Industry as a whole benefits due to availability of standard solutions and vendors

The implementation model should ensure following key points to achieve the vision of interoperable, vendor/bank agnostic NCMC solution.

- Segregation of Ticketing engagement from Payment RFP
- Operators should approach AFC vendors for deployment of ticketing solution and application
 - Banks to be approached only for payment acquiring and settlement
 - Avoid CAPEX investment through an acquiring bank
 - The cost of the payment readers / gate validators may either be picked up by the operator or the banks may provide a rental model to the operator
- As a short term option the acquiring bank may provide instant issuance of Rupay NCMC prepaid cards on a limited basis
 - Till such time every customer starts carrying an EMV open loop stored value card, acquiring bank may provide limited issuance
- Some of the operators may need support to their existing business operation challenges
 - Particularly in bus environment, it may be prudent to develop a regional AFC hub for 4-5 operators combine

6.3 Required Activities for NCMC Implementation

S.No.	Activity	Description
1	AFC Deployment/Upgrade	<ul style="list-style-type: none"> o Upgrade of existing ETIMs with EMV devices certified as per NCMC specification <ul style="list-style-type: none"> o Level 1 (Hardware) to be certified as per EMVCo o Level 2 Kernel (Software) to be certified as per NCMC specs o Level 3 (Payment Application) to be certified as per NCMC specs o Complete back-office deployment to support Automatic fare Collection System

9 Commercial Pricing

The commercial pricing structure for RuPay - NCMC will remain similar to any bank issued payment card. There are two types of transactions namely ON-US transaction and OFF-US transaction as described below:-

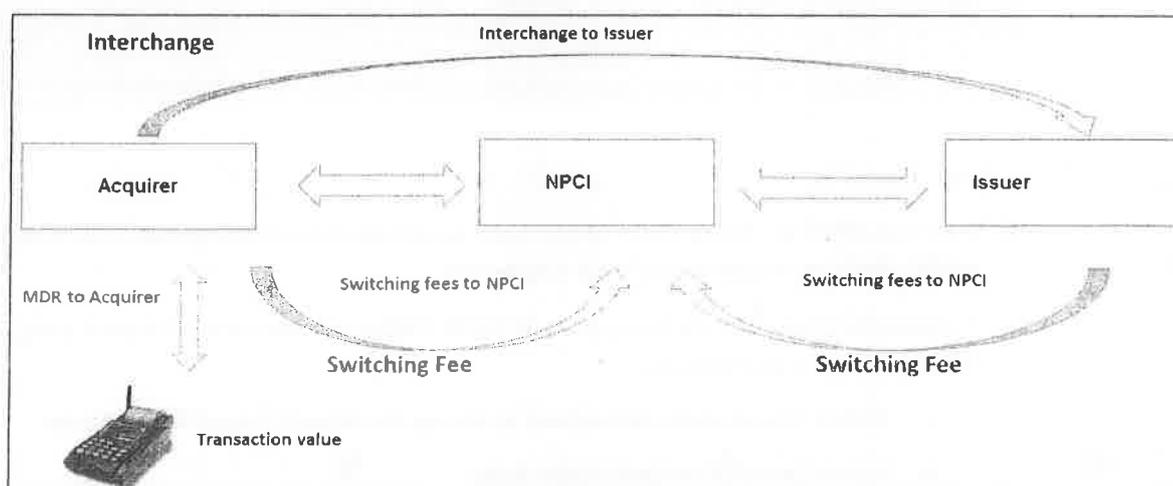

- **ON-US Transaction** are transactions where Issuer and Acquirer Bank are same. Hence, these transactions are not routed via Payment Scheme switch.
- **OFF-US Transaction** are transactions where Issuer and Acquirer Bank are different. These transactions are routed via Payment Scheme switch.

In case of OFF-US transaction, the commercial pricing structure will consist of following components:-

- **Merchant Discount Rate (MDR)/Transaction Fee** payable by Merchant to Acquirer Bank is a fee charged by the Acquirer Bank to the Merchant for accepting payments from customers through credit/debit/prepaid card.

It is to be noted that in case of debit card, RBI has defined the guidelines with upper limit on MDR. In case of credit and prepaid card, it is as per the individual negotiation between the Acquirer Bank and merchant.

- **Interchange Fee** payable by Acquirer Bank to Issuer Bank is the fee paid by the Acquirer Bank to card Issuer Bank for each card transaction. This fee will be as per the prevalent circular floated by card scheme from time to time.
- **Switching Fee** payable by Issuer and Acquirer to Payment Scheme is the fee charged by card scheme to facilitate the inter-bank transactions. This fee will be as per the prevalent circular floated by card scheme from time to time.

10 NCMC Ecosystem Pilot at Delhi Metro Rail Corporation (DMRC)

In order to showcase the entire NCMC ecosystem for digital fare collection along with indigenized Gates, AFC and Validators, the pilot has been done at Delhi Metro across few stations. The pilot at DMRC was initiated by MoHUA on Jan 31st, 2019. This has been done in collaboration with CDAC, BEL, NPCI and SBI (as an Acquirer Bank). Under this pilot, NCMC based Gates, Validators and AFC has been deployed across few stations of DMRC and RuPay Contactless Debit Cards with NCMC has been issued to a closed user group for testing. The settlement between Acquirer and Issuer Banks is being done by NPCI.

10.1 Roles & Responsibilities of Involved Stakeholders

The pilot implementation ecosystem consists of following stakeholders:-

Stakeholders	Roles and Responsibilities
DMRC	<ul style="list-style-type: none"> DMRC is a public transport authority for implementing NCMC solution at identified metro stations in Delhi.
CDAC	<ul style="list-style-type: none"> CDAC has provided the indigenous AFC system based on NCMC standards.
BEL	<ul style="list-style-type: none"> BEL has provided the EMV compliant NCMC based validators and gates to support offline purchase transactions at metro station entry/exit gates.
Acquiring Bank	<ul style="list-style-type: none"> SBI is the acquiring bank and responsible for presenting all online as well as offline transactions to NPCI for settlement.
Issuing Bank	<ul style="list-style-type: none"> Issuing Banks are responsible for issuing cards through branches as per regular process.
NPCI	<ul style="list-style-type: none"> NPCI is responsible for settlement of all the inter-bank transactions received from acquirer.

10.2 Key Highlights

- a) Banks certified on RuPay Debit NCMC have issued cards to closed group users from CDAC, BEL, DMRC, NPCI and Issuer Banks' own employees.
- b) Following transactions are being done at DMRC Metro stations under this pilot using NCMC cards issued by any certified banks:-
 - o Online Money Add transactions to top-up the Stored Value/Offline Wallet
 - o Online Service Creation transactions
 - o Offline purchase transactions using Stored Value at Metro station
 - o Offline balance enquiry to know the balance in Stored Value

10.3 Launch of One Nation One Card

Marking the beginning of a new era of payment segment, Hon'ble Prime Minister Narendra Modi launched **'One Nation One Card'** as a part of NCMC Eco-system in Ahmedabad on 4th March, 2019.

This card is based on RuPay NCMC specification and aimed at providing seamless digital payments across various use cases including metro, bus, suburban railways, toll, parking, smart city, retail and other use cases.

11 RuPay – NCMC Proliferation Strategy

The first NCMC project went live in Jun 2017. Post that, many operators from Transit and Smart Cities segments have been on-boarded for NCMC based fare collection system or common card payment system. However, the penetration of NCMC card has not picked up significantly due to various challenges associated with involved stakeholders. In this regards, a holistic approach is required across target segments to enable the faster and higher penetrations of NCMC cards across India. With the key proposition of One Card for all Payments; the higher penetration of NCMC cards will help to drive the digital adoption in payment space across the country.

This section talks about the proliferation strategy in Transit, para-transit and retail segments to drive the adoption of RuPay - NCMCs at a faster pace in an effective manner. This requires the cohesive support from all involved stakeholders including Operators/Merchants, Financial Institutions, Payment Scheme Network and Government.

11.1 Transit Segments

This segment covers various public transport systems including metro, buses and suburban railways. As described in Section 6 of this document, NCMC implementation across these public transport systems include following key aspects:-

- **AFC system including backend and Terminals/validators/ETIM devices as per NCMC specification** – Currently, Operators are managing the fare collection system either in-house or through AFC system provided by System Integrator. For operators managing the AFC system through System Integrator, the NCMC implementation requires required up-gradation as per NCMC specification. Whereas, for operators managing the AFC system in-house, the AFC system need to be developed accordingly and should support the transactions done using RuPay - NCMCs.
- **NCMC certified partner banks as an Acquirer Bank and Instant Issuer Bank (if required)**

The roles & responsibilities of involved stakeholders for NCMC proliferation across Transit segments are as covered in this section.

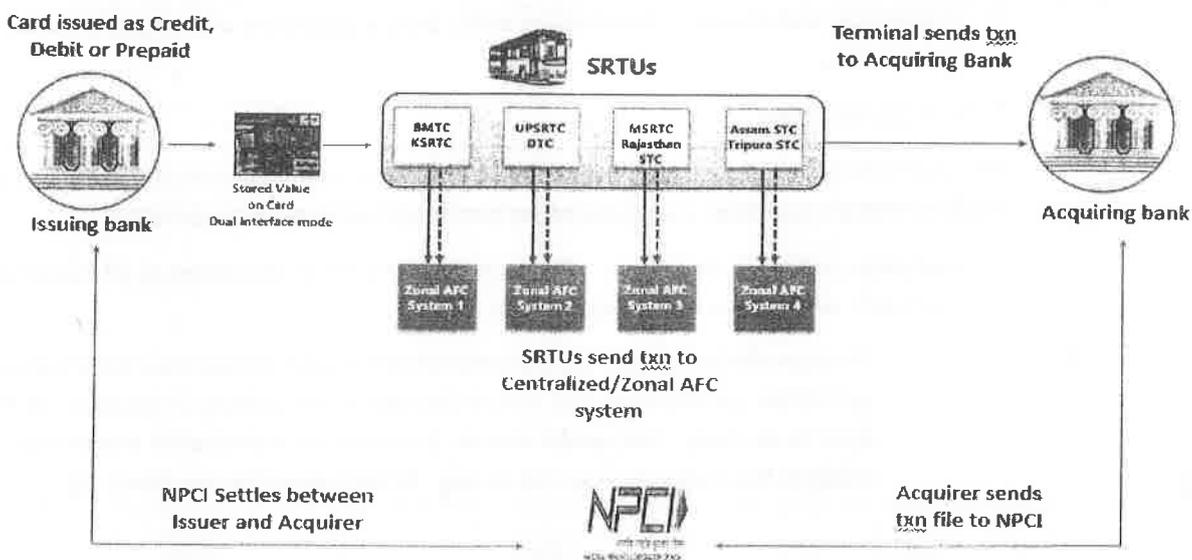

11.1.1 Role of Operators

The approach of operators will be driven by the project type – Greenfield or Brownfield projects, as described below.

- **Greenfield Projects** – These are new projects built from scratch and it does not have the constraints in terms of legacy infrastructure. These projects require fresh procurement of devices, software and fresh installation of set up. The upcoming BRTS/Urban mobility Projects are covered under such projects. **For all such projects, the operator should directly go ahead with the implementation of digital fare collection in line with NCMC specification.** This would enable the NCMC acceptance from day 1 and also avoid any financial implication to the operator on account of existing system up-gradation to NCMC based system at a later stage.

- For Greenfield projects, the operator should procure the devices including terminal/validator/ETIM devices as per NCMC specification.
- For acquiring and card issuing purpose, the operator should follow the multi-banks acceptance scenario (as described in Section 6) wherein the customers should be able to use RuPay - NCMCs issued by any bank.
- **Brownfield Projects** – Such projects are operational & carry the legacy of closed loop ecosystem. The NCMC implementation in such projects require the replacement/up-gradation of existing terminal/validator/ETIMs as per NCMC specification. This may involve certain investment on account of infrastructure up-gradation. Government support for such projects will help to expedite the NCMC proliferation in this segment.
 - For all such projects, the future extensions should be done in line with NCMC specification.
 - Operators should discuss with existing vendors for up-gradation of existing devices to enable NCMC acceptance. PTO may also consider the replacement of existing devices with NCMC compliant devices in phase wise manner with buyback of existing devices.
 - For acquiring and card issuing purpose, the operator should follow the multi-banks acceptance scenario (as described in Section 5) wherein the customers should be able to use RuPay - NCMCs issued by any bank.
- **Concept of Centralized/Zonal AFC** – At present, the operators have deployed the AFC infrastructure at the individual level. The AFC infrastructure deployment may not be possible for small scale operator on account of the cost involved. The provision for Centralized/Zonal AFC will help to enable the acceptance of RuPay - NCMCs across all public transport operators (small as well as large scale).

The model architecture for Centralized/Zonal AFC in case of SRTUs has been shown below.

In case of Centralized AFC System, there will be a single AFC System across all SRTUs. This will act as a plug n play system for all SRTUs. In case of Zonal AFC System, the AFC System will be at the regional or zonal level. This will act as a plug n play system for all SRTUs under that region. This Zonal AFC System may be managed by a representative SRTU of the respective region.

Centralized/Zonal AFC model offers the savings on account of AFC system deployment cost by individual operators. This will also offer the matured system with best practices across various operators. This will further help in faster implementation of digital fare collection.

11.1.2 Role of Banks

All Banks need to support the vision of NCMC implementation from issuance and acquiring related aspects based on multi-banks acceptance scenario as detailed out in Section 5 of this document.

- **Banks certified on NCMC platform should issue NCMC Debit/Credit cards as default debit/credit cards to the customers.** To start with, Bank should go ahead with RuPay debit/credit card issuance in cities where NCMC based transit projects are operational or under implementation. This needs to be further extended across all potential cities of India. This will help to eliminate the extra effort by PTO or partner bank on account of transit project specific card issuance.
- The transaction charges payable by PTO to the Acquirer Banks should be nominal and in line with Industry practice. Customer should not be burdened with extra cost for issuance of cards.

11.1.3 Role of Card Scheme

The role of card Scheme will involve following key activities:-

- Settlement of inter-bank transactions done using RuPay - NCMCs.
- Provide hand-holding support to all operators for NCMC implementation.
- Interaction with involved stakeholders in the transit ecosystem and onboard them for NCMC specification.

11.1.4 Role of Government

The government has a key role in enabling the NCMC proliferation across the country by providing implementation mandates and financial support to all transit project operators.

- **Mandates to Transit Operators** – Government should issue **mandates to all transit operators for NCMC adoption** as mentioned below:-
 - For Greenfield projects, the operator should deploy all the required infrastructure as per NCMC specification and ensure the digital fare collection based on NCMC based open loop cards. The model should be based on multi-banks acceptance scenario wherein the customer may use RuPay - NCMCs issued by any Bank.

- For Brownfield projects, the operator should ensure the future extensions in line with NCMC specification. Also the up-gradation of existing system should be planned in a time-bound phase-wise manner.
- **Financial Support to Transit Operators** – In view of the financial conditions of operators across the country, the government should consider provision of the financial support to concerned operators to ensure the NCMC proliferation across the country. The financial support may be provided on following items:-

Particulars	Greenfield Projects	Brownfield Projects
AFC Deployment		<ul style="list-style-type: none"> ○ Required for operators managing the fare collection in-house and not having AFC system ○ Centralized/Zonal AFC system may be a potential solution for operators across the country
Terminal/Validator/ Device Up-gradation		<ul style="list-style-type: none"> ○ Cost involved in up-gradation/replacement of existing devices with NCMC compliant devices
Subsidy on MDR/ Transaction Charges payable by Operator to Acquirer Bank	<ul style="list-style-type: none"> ○ Subsidy on transaction charges payable by Operator to Acquirer Bank for transactions done using RuPay - NCMCs for a defined period 	<ul style="list-style-type: none"> ○ Subsidy on transaction charges payable by Operator to Acquirer Bank for transactions done using RuPay - NCMCs for a defined period

- **RBI KYC norms for Transit Segments** – Basis the customer profile using the transit segments, there are significant number of customer who do not fulfill the criteria of Full KYC/Minimum KYC norms as per RBI regulation. Hence, the NCMC adoption is not getting proliferated across these customer segments. In view of the same, there is a need to relax the KYC norms for such customer segments. This segment may have a reduced upper limit on total transaction value as compared to that of minimal/full KYC customers. These customers may further get upgraded to minimum/full KYC based on applicable RBI KYC norms.

11.2 Retail Segments

With the proposition of 'One Card for all Payments', the RuPay NCMC has a huge potential for retail segment. As per RBI existing KYC norms, these cards may be used in contactless mode without 2nd
